CALDERWICK PUMP SYSTEMS LTD

Purchase Approval Authority Matrix, Version 1

Document code	FIN-AAM-01
Version	1.0
Effective date	1 April 2024
Owner	Chief Financial Officer
Approved by	Board of Directors, Resolution 2024-03 of 14 March 2024
Classification	Internal

1. Purpose and scope

This matrix sets who must approve a purchase order (PO) before it is sent to a supplier. It applies to every PO raised by any Calderwick site, including the Head Office and Plants P1, P2 and P3. It does not cover payroll, tax payments or intercompany charges.

2. How to use this matrix

The PO value is the total value of the order in USD, excluding tax. Find the band for that value in Table 1; the approver for that band must approve the PO. Then check Table 2: if a co-approval rule applies, the co-approver must also approve. A PO needs every approval that applies before it is released.

Approvers are named by role. The person holding a role, or acting in it, is listed in the current staff directory published by the Head of People.

3. Approval bands

Table 1 - Approval bands by PO value

Band	PO value (USD, excluding tax)	Approver
A	up to 10,000	Budget-holding department head
B	10,001 to 50,000	Head of Procurement
C	50,001 to 250,000	Chief Financial Officer
D	250,001 to 1,000,000	Chief Executive Officer
E	above 1,000,000	Board of Directors, by resolution

4. Co-approval rules

Table 2 - Co-approval rules (in addition to the band approver)

Rule	Applies to	Co-approver
CA-1	IT and OT (operational technology) hardware or software with a PO value above USD 25,000	Head of IT
CA-2	Any contract with a term longer than 24 months	General Counsel
CA-3	Capital projects with a PO value above USD 100,000	Chief Operating Officer

5. Emergency purchases

When equipment failure stops production or testing, the Plant Manager of the affected plant may approve an emergency repair purchase up to USD 15,000 without waiting for the band approver. The band approver must ratify the PO within 5 working days. Emergency approval cannot be used for planned replacements or for spares bought after the repair is complete.

6. Splitting orders

A purchase must not be split into several POs to bring each PO into a lower band. Internal Audit reviews POs to the same supplier raised within 30 days of each other, and any split found is reported to the Chief Financial Officer.

7. Review

The Chief Financial Officer reviews this matrix every year. Any change must be approved by the Board of Directors and is issued as a numbered amendment that states which parts of this version it replaces.
