CALDERWICK PUMP SYSTEMS LTD

Hollins Cross Plant Report, August 2025

Document code	OPS-P1-2025-08
Site	Plant P1, Hollins Cross (assembly)
Prepared by	Plant Manager, Hollins Cross (P1)
Date	4 September 2025
Classification	Internal

1. Summary

Calderwick Pump Systems Ltd's Hollins Cross plant assembled 1,240 pumps in August 2025, 40 above plan. First-pass quality was 98.2%. Work on assembly line 3 automation (PRJ-12) reached 55% completion.

2. Key figures

Table 1 - August 2025

Measure	August 2025	Plan or target
Pumps assembled	1,240	1,200
First-pass quality	98.2%	98.0%
On-time dispatch to customers	95.4%	95.0%
Lost-time injuries	0	0
Near misses reported	3	-
Headcount at month end	243	244

3. Materials

Gate valves from Brennock Valve Supplies Ltd ordered on PO-10203 arrived on 30 July, ending the valve shortage of June and July. Castings supply from Fenwick Bay was normal. Extra castings will be bought from Hartwell Steel Castings Ltd in September to cover the Fenwick Bay furnace shutdown in November.

4. Safety

On 12 August a forklift reversed close to a pedestrian in aisle 4; no one was hurt. The Health and Safety Manager has ordered physical barriers between forklift and walking routes in aisles 3 to 6, to be installed in October. Supervisors were reminded to check forklift certificates in the training register before each shift.

5. Projects

PRJ-12: the robot cell for line 3 was installed in August; commissioning is planned for October 2025 and handover by 31 January 2026. The solar canopy over the car park (PRJ-16) was ordered in July and will be installed in October.
