CALDERWICK PUMP SYSTEMS LTD

Framework Agreement CON-2025-008: Rig Controls and Engineering

Contract number	CON-2025-008
Supplier	Ardent Controls Ltd
Supplier vendor ID	VEN-052
Term	1 February 2025 to 31 January 2028
Signed	24 January 2025
Classification	Confidential

1. Parties and purpose

This framework agreement is between Calderwick Pump Systems Ltd ("Calderwick") and Ardent Controls Ltd ("the Supplier"), vendor ID VEN-052. It sets prices and terms for controls hardware, firmware and engineering services for the hydraulic test rigs at Plant P2, Ardmoor. It does not oblige Calderwick to buy any minimum quantity.

2. Term and approvals

The agreement runs for 36 months, from 1 February 2025 to 31 January 2028. Because its term is longer than 24 months, it was co-approved by the General Counsel on 20 January 2025 under rule CA-2 of the approval matrix. It was signed for Calderwick by the Head of Procurement and the General Counsel, and for the Supplier by its Managing Director, Corin Ashby.

3. Ordering

Calderwick orders under this agreement by sending a purchase order (a call-off) that quotes CON-2025-008. Each purchase order is approved under Calderwick's approval matrix. Under Calderwick's Procurement Policy, a single call-off above USD 150,000 needs a written evaluation of the Supplier's offer before it is placed.

4. Prices

The prices in Schedule 1 are fixed until 31 January 2026. On each 1 February after that, the Supplier may raise them by the change in the consumer price index over the previous year, up to a maximum of 3%.

5. Delivery and warranty

Stocked items in Schedule 1 are delivered to Ardmoor within 15 business days of the purchase order. Engineering services start on the date agreed in the purchase order. Hardware is guaranteed for 24 months from delivery; the Supplier replaces faulty hardware free of charge within 5 business days of notice.

6. Contract management

Table 1 - Contract management

Responsibility	Calderwick	Supplier
Contract owner	Procurement Manager, Plant Services	Key Account Manager
Technical contact	OT Systems Engineer	Lead Controls Engineer
Remote access to rig controls	Approved per session by the OT Systems Engineer under the IT Security Policy	Uses the Calderwick jump host only

Schedule 1 - Price list

Schedule 1 - Price list valid to 31 January 2026

Item code	Description	Unit	Price (USD, excluding tax)
AC-HPU-7	PLC controller for a rig hydraulic power unit	Each	32,400
AC-HMI-12	Operator panel (HMI), 12 inch	Each	7,300
AC-FW-R	Controller firmware licence	Per rig	6,500
AC-ENG-D	Controls engineering	Per engineer day	1,450
AC-SUP-V	On-site support visit	Per visit	950
